

Cabinet measuring worksheet

One unit throughout | Measuring diagrams, not to scale

A. Face-frame opening

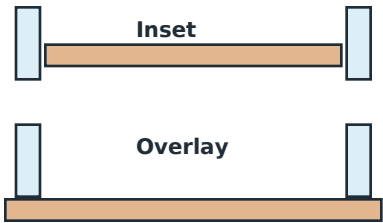

Inspect at product height.

B. Frameless + hinge

Inspect at product height.

C. Door position

Top view; mounting varies.

A frame can narrow access; hinges can intrude in either construction.
Inset is a door position, not a separate box type. Use the exact installation drawing.

Cabinet / location: _____ Date: _____ Unit: inches / cm
Product + model: _____ Cabinet: framed / frameless / unsure
Door position: overlay / inset / unsure Instructions or drawing: _____

Check	My measurement	Exact product requirement
Interior width / depth / height	_____	_____
Narrowest usable opening width	_____	_____
Usable depth from required datum	_____	_____
Usable height / loaded height	_____	_____
Hinge, frame, supports, obstructions	_____	_____
Door opening + full operating travel	_____	_____
Mounting / fixing compatibility	_____	_____
Organizer + supporting load limits	_____	_____

Decision: ☐ Fits documented requirements ☐ Does not fit ☐ Needs clarification

Any failed requirement stops the fit decision. Unknown capacity is not a passing result.
Confirm width, depth, height, fixings, capacity, and loaded movement separately.

Capture the evidence

Photo reference: _____ Tape reading / obstruction: _____
What moved first before the reset? _____
Loaded access / closing / cleaning check: _____

Planning aid only. Follow cabinet and organizer instructions; do not force a fit or guess a load limit.
